Cloud Surfers

For families with children aged 8–12

How can we build **digital resilience** within the **physical family context** for children aged **8 to 12**? A physical board game that sparks open conversation between parent and child at the kitchen table — **from screen conflict to connection**.

IN THE FAMILY CONTEXT **Playful conversation at the table** — Exploring the online world together without judgment or conflict

BOARD GAME PROTOTYPE **Real dilemmas & situations** — Tangible game cards linked to actual digital experiences

THE PROBLEM

Barriers in Communication

Why talking about online life at home so often gets stuck:

01 **Busy lifestyle** — Little time and calm for an open, relaxed conversation at the table.

02 **Lack of understanding** — Parents feel disconnected from fast-moving online worlds and trends.

03 **Tension in experiences** — Children fear anger or a screen ban when sharing negative online moments.

04 **Expressing thoughts** — Difficulty putting emotions around peer pressure, FOMO, and games into words.

05 **Hesitation to act** — Parents often do not know how to open the conversation in a safe way.

THE SOLUTION · 3 PILLARS

Digital Resilience (8–12 yrs)

Cloud Surfers moves the conversation from the screen to the game board:

PILLAR 01
Recognising digital risks
Children learn to autonomously spot manipulative triggers, peer pressure, and personal boundaries in games and social apps.

PILLAR 02
Seeking help to recover
Removing shame and fear: when something unpleasant happens online, children learn to turn to parents without hesitation.

PILLAR 03
Learning from negative experiences
Not blocking or punishing, but reflecting together: turning online mistakes into self-confidence, self-regulation, and resilience.

BOARD GAME DYNAMICS

The 5 Consecutive Phases of the Game

From first moment of play to lasting family agreements

01 JOINING
Joining
Taking a seat at the table together in a low-threshold way. Creating an open, safe atmosphere without judgment or control.

02 SENSITISING
Sensitising
Collecting screenshots and situations of moments that made the child laugh or bothered them ("Task system").

03 FOUNDATION
Foundation
Building on a strong shared foundation at the kitchen table:

Fun · Understanding · Realism · Trust

04 PRACTICE
Practice
Playfully resolving relatable scenarios on the cloud board and learning to voice thoughts about the online world.

05 APPLICATION
Application
Capturing concrete family agreements on a "Greetings from the online world" postcard for the living room or kitchen.

ABOUT MONIMENTOR

What is Monimentor?

Screen time guidance for children aged 4 to 12. No hard blocks or taking devices away, but playfully teaching children self-regulation with "energy marbles". From conflict to collaboration in the digital family.

Research & Design: **Klaske Galema MSc.** (TU Delft · MSc Strategic Product Design) · Initiative: **Monimentor** (Maarten Nijhuis MSc.)
